Subject: Eisenbarth TTPC Analysis Discussion

.....
 >>>>>>
 Mr. Justice,

I am Steve Tink and have taken Joe Swearman's environmental role for the Eisenbarth Incident. Unfortunately, the proposed date of September 23rd to discuss TTPC analytical method information will not work for our technical staff. I would like to propose Wednesday September 24th. Sometime in the afternoon would be preferable.

Sincerely,

Steve Tink

Good Morning Kristy,

Is there any way we could do Wednesday, the 24th? I'll be in Atlanta on the 23rd for a meeting. I could also Monday morning before 12:15, when my flight leaves.

Thanks,

Kelly

Hi Kelly-

The EPA would like to schedule a call with us at 1:30 CT on Tuesday, Sep. 23. Are you and your team available at this time?

Thanks,

Kristy

Steve and Kristy,

This is an item that I am leaving for you to coordinate with CTEH.

Joe

Good Afternoon Mr. Swearman,

I have heard by from our laboratory folks. Would Tuesday September 23, 2:30 pm EDST work for a conference call? Let me know and I can confirm the dates and one of us can set up a conference line.

Also, I will send our SOPs under separate cover, tomorrow. Would you be able to provide the SOPs being used for the analysis of samples collected by CTEH?

Thank you,

JJ Justice

Subject: Eisenbarth TTPC Analysis Discussion

Mr. Justice,

Thank you for previously sharing TTPC analytical method information.

Our technical staff at CTEH have completed their review of this first submission and wish to participate in technical discussion with the appropriate EPA or EPA contractor staff.

The following are proposed topics:

- ∇ General information about extraction procedures
- ∇ Did they use direct injection method (ex. using 6460 instrument and no extraction required)
- ∇ Calibration summary data (or find range of which they are reporting)
- ∇ Determine if they use second source for validating method. If so, what standard
- ∇ General info about their method development. Hopefully, they will give us a copy of their SOP.
- ∇ Discuss holding time criteria (if they have a target date)
- ∇ Discuss if MDL or additional validation steps have been performed
- ∇ How are they storing samples? Are they retaining extracts?

Could you please advise on any of your thoughts regarding this technical discussion and, if you consent, provide a technical contact for coordination?

For expediency, please reply to the parties on the Cc line in your reply.

Thank you.

Best regards,

Joe Swearman
